FINAL CUT	3
PREMIER PRO.....	6
TEXT SAMPLES	9

FINAL CUT

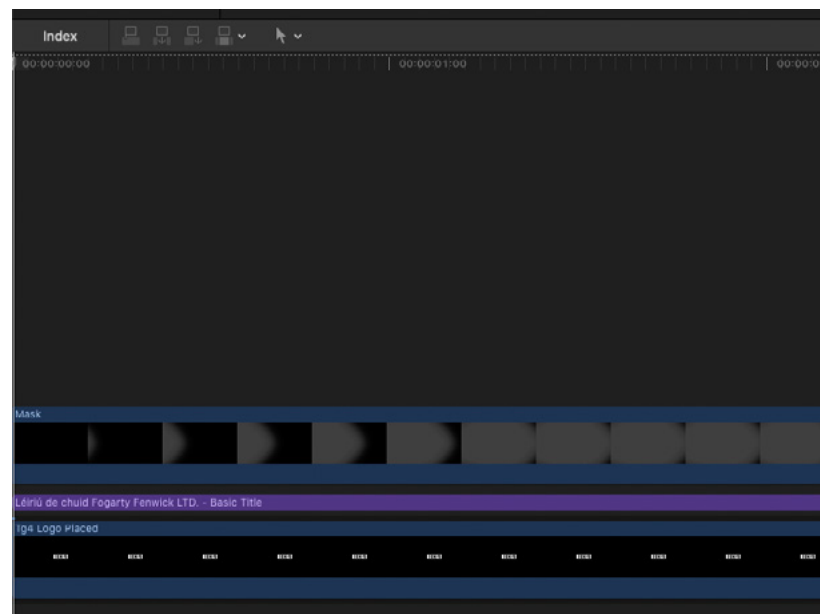

1. Create a new Library
2. Import this Media from folder 'Rendered Elements' into your Library

3. Create a new Project. Call it Leiriuchan ENDBOARD.

4. Drop the media (Tg4 Logo Placed & Mask) into your project timeline. Then create a basic Text layer and place it in between Tg4 Logo Placed and Mask.

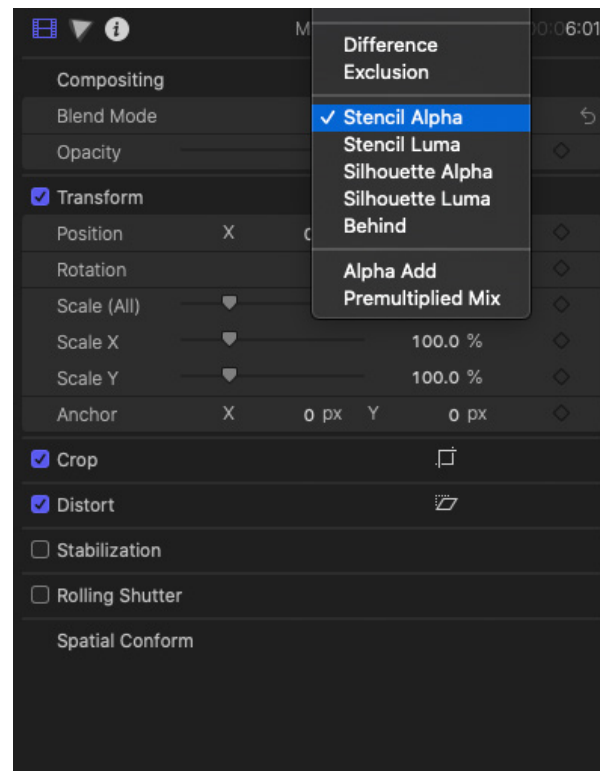

FINAL CUT

5. Below are the properties to use on your text layer. Ensure you have installed the correct Font (FS Lucas Regular) which you can find in the 'LEIRIUCHAN ENDBOARDS' folder in a subfolder called 'Font'

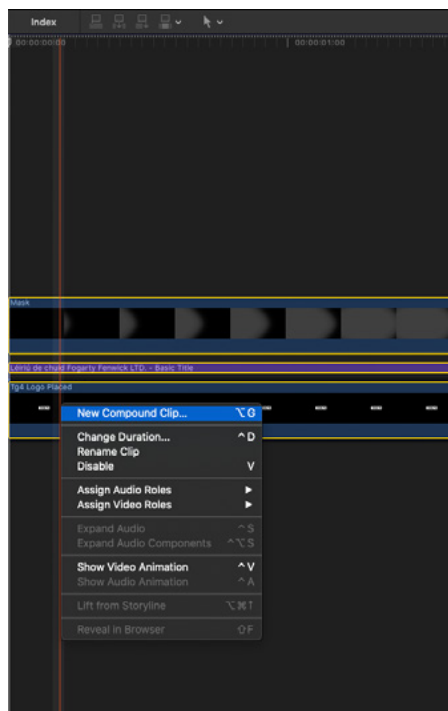

6. Once you have your text set up, select the Mask layer. In its properties, change the Blend Mode to Stencil Alpha.

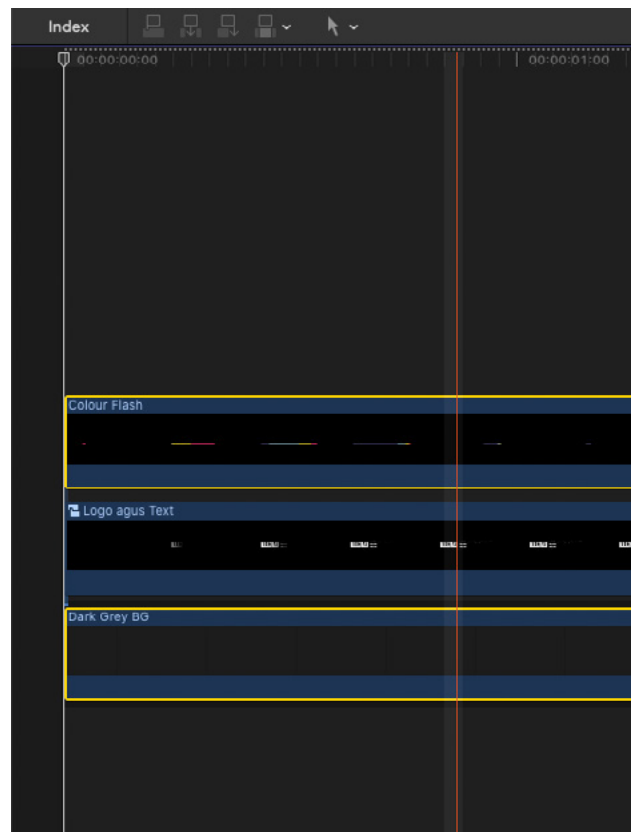

FINAL CUT

6. Select all your layers in the timeline, CTRL + Click and create a New compound clip & call it Logo agus Text

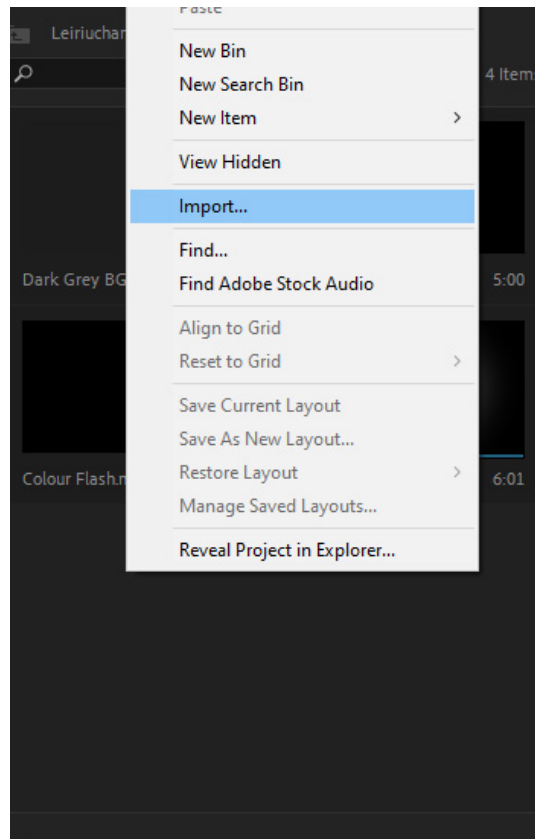

7. Finally return to your Project 'Leiriuchan ENDBOARD' and drop the Color Flash and Dark Grey BG media into your timeline. Make sure Colour Flash is above your Compound Clip and Dark Grey BG in below it.

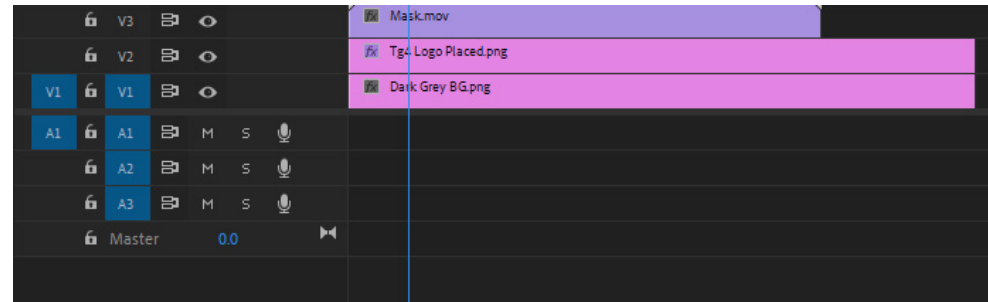

Once all this is done you should have a working Endboard Template.

PREMIER PRO

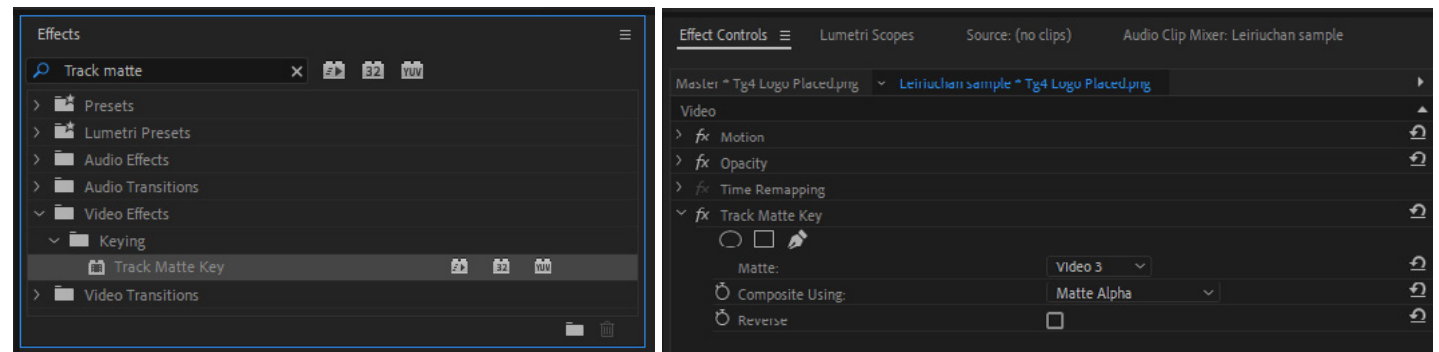

1. Create a new Project.
2. Import Media from the 'Rendered Elements' folder

3. Drop the following media into your timeline in the relevant video layers:
V1: Dark Grey BG V2: Tg4 Logo Placed V3: Mask

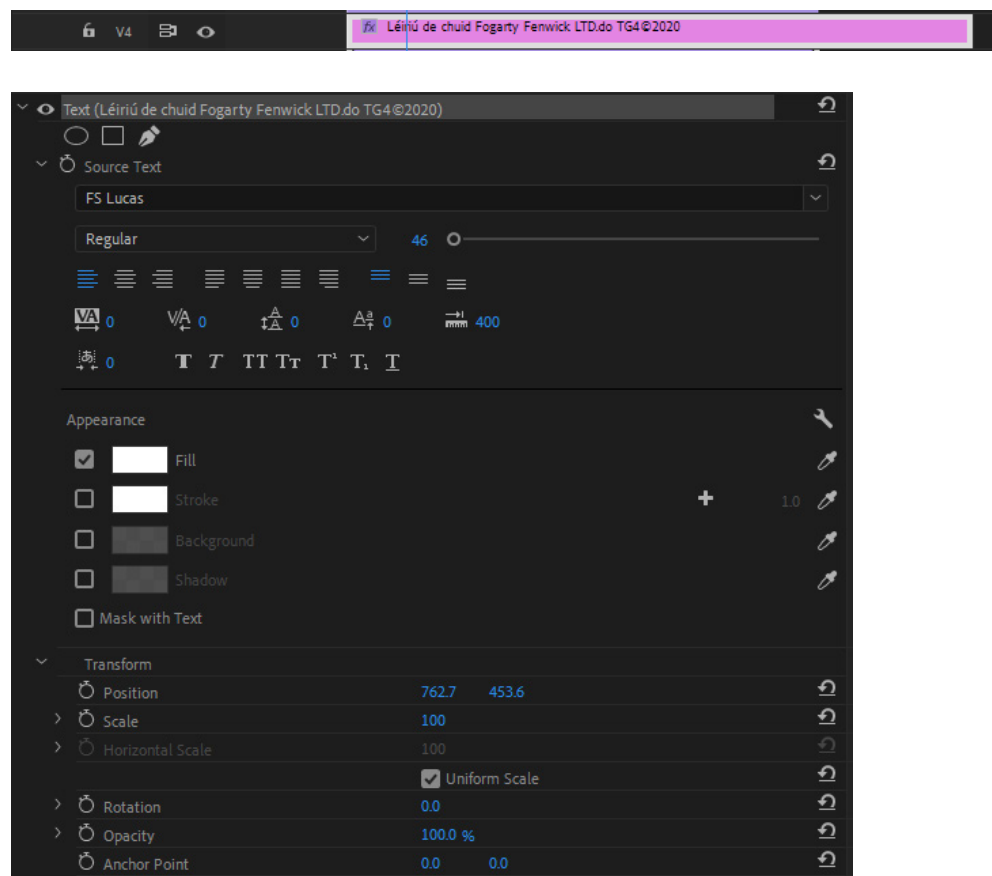

4. Search effects for Track Matte. Once found, drag and drop effect onto the Tg4 Logo Placed layer in your timeline. In the layers properties ensure that the Matte function is set to Video 3 as seen below

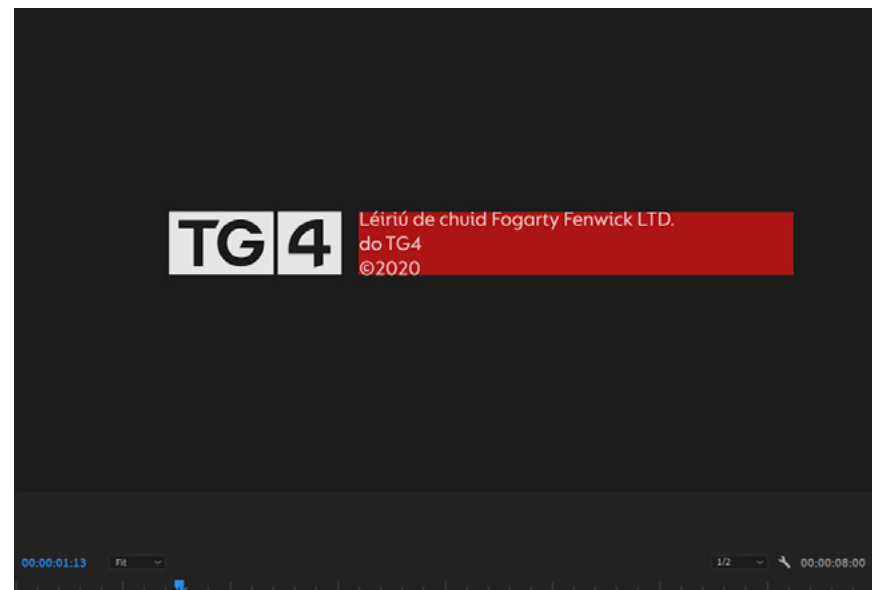

PREMIER PRO

5. In Video Layer V4 in the timeline, Create a new Text Layer using the following Properties.

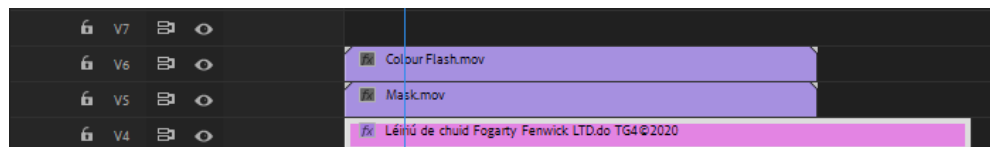

6. To ensure the correct size of your text box, there is a Text Safe.png in 'Rendered Elements' that can be used. Import this png and place in your timeline temporarily so that you can line up your text correctly. When done make sure you delete the safe text from your timeline.

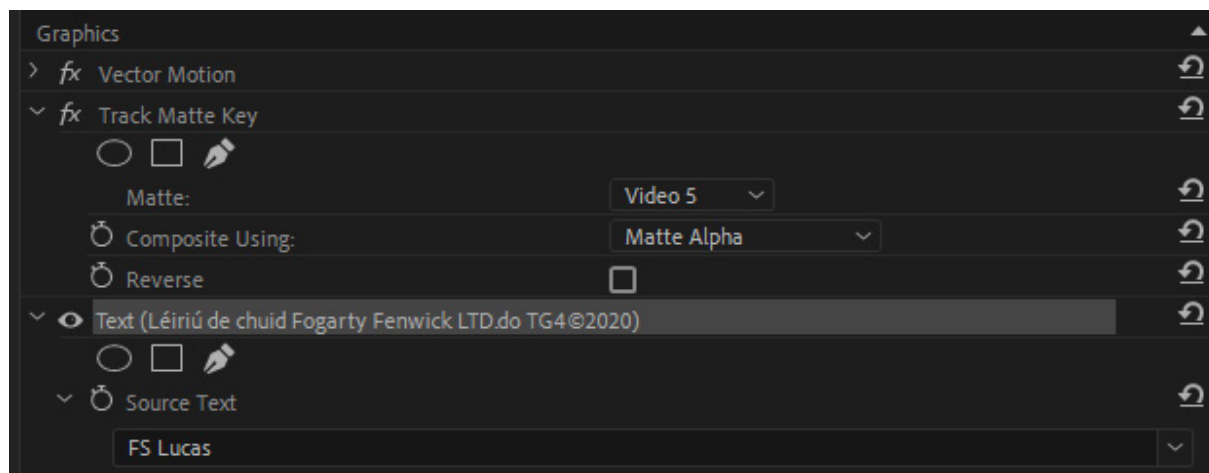

PREMIER PRO

7. Drop the following media into your timeline in the relevant video layers:

V5: Mask V6: Colour Flash

8. Return to the text layer. Drop Track Matte effect onto the layer. In the layers properties ensure that the Matte function is set to Video 5 as seen below

Once all this is done you should have a working Endboard Template.

TEXT SAMPLES

Léiriú de chuid Eo Teilifís, Léirithe Thír Eoghain
& Cruach C.G.A
do TG4 ©2020
